Reference !
Connection method for Internet !

■Connect to Internet !

As for Internet mansion,

It is a service that a renter can connect with the cable inside room immediately without any troubling procedure.

【For necessities】

· Lap top
· LAN adapter (Ethernet 10Base-T or 100Base-TX)

  *If you use a lap top attached LAN adapter, you don't purchase it.
· LAN cable(100Base-TX straight type)

  *If you insert a plug in your socket, you need to have a LAN cable (10 Base-T or 100Base-TX straight type)   There are two kinds of types, strait and cross, in cable.

  Please make sure to purchase a straight type cable.

【Notice】

If your lap top is NOT a latest model, you have to purchase LAN adapter and LAN cable at nearly computer-shops.

There are many kinds of LAN adapter: card type, board type and USB type.

So please make sure to purchase one which match on your PC.

Please enjoy optical fiber Internet access !

Vary according to the specification and environmental condition of your laptop.

If you have any problems in terms of access to the Internet, please feel free to contact us.
